Dear Outside World:

3-16-20

My prayers go out to all whom have lost a love one as a result of the Coronavirus. I hope that everyone is taking this man made Pandemic seriously, and doing the common sense things to keep safe and healthy. Has anyone asked the question, why is this virus attacking the elderly so aggressively?

My personal opinion, is that the Covid-19 (Coronavirus) was engineered and designed for the purpose of "population control", and it was engineered to attack the elderly so aggressively because the elderly and sickly are no longer an asset to the labor work force. It cost government more to take care of the elderly and sickly than they are worth to the labor work force. In today's Capitalist society, your survival is based on being a productive worker of the labor force.

Should we be worried? Well yes, we should be worried! We have this orange buffoon Trump, who is more concerned about the stock market, than he is about human lives. Instead of being truthful with the American people and informing them that this Coronavirus Pandemic is very serious, and that the government along with the help of the American people can combat and beat this killer. The orange

Pg. 2 of 2

Donald Trump, is spinning the American people with false information which is making them feel a sense of panic. The reason Trump is trying to make it appear that his administration has it all under control, is not to rattle the stock market. Shame on you, President Trump! Shame on you!

The CORONAVIRUS (Covid-19) is not the flu or the common cold as some has suggested. It's a man made virus, engineered for the sole purpose of population control, and to wipe out the elderly and sickly who are no longer productive members of the labor work force. This is just how I see it!

Strong but Human,
