Hello T: Hope my words find you in peace. Sorry for my delay in responding to your last post, but I've been very busy with legal matters. I just submitted my petition for Transfer to the Indiana Supreme Court, and I'm awaiting a ruling.

Everyone inside of this belly of the beast (prison) are bracing for the Coronavirus to hit and take out all the elderly and sickly prisoners. The prison officials are not prepared for an outbreak for the simple reason, they don't care! Already prisoners have complained about feeling sick, and were told that it's just the flu. No test are being done and prisoners are just being sent back to their cell. Why aren't they testing prisoners for Covid-19? Because if a prisoner test positive for the Covid-19, then they would have to lockdown the facility, and locking down the prison means losing money!

Yes, I share a cell with another prisoner, and over the years I've learned to adapt to the character and personality, I'm in the cell with. It's all about respect, communication, and setting boundaries. Both me and my bunkie have prison jobs, so it allows us both to have time and space to ourselves.

Yes, I work outside on the grounds crew, and here soon I will be cutting grass. The weather here has been warm but rainy. We didn't get much snow this season, and you can blame it on climate change... which is not a hoax! How the weather in the UK? What kind of work do you do if any? You be good to yourself!
