Recording a window of opportunity

On the March 5th, 2020, edition of the ABC -TV show - 'Nightline' - they broadcast a Florida death row inmate under an active death warrant accusing the Pinellas County, prosecutors of prompting a notorious jailhouse snitch to give false testimony against him in order for them to obtain a conviction of first degree murder! This same jailhouse snitch was used by the Pinellas County prosecutors to testify in 50 other other cases and helped in sending 13 others to death row!

What really makes this revelation news worthy is the fact that all of this happened over three decades ago and is only now coming to light due to the actions of a whistle blower from within the legal system who got ABC - to air this death row inmates story of how he was wrongfully convict of murder and in effect telling/showing how this evidence had been suppressed by the Florida legal system for all of these years, due to it having the potential of opening a can of worms that reveals a much larger pattern of prosecutor misconduct in obtaining and maintaining conviction by any means possible!

I am also from Pinellas County, Florida, and have maintained my innocence of any kind of murder for nearly 38 years and have done my best to record both publically on the internet and in the courts, the evidence proving when I stood midway through the farce and mockery of my trial to shout to the judge and jury that I was being railroaded there is overwhelmingly evidence proving I was actually railroaded. What makes these criminal actions perpetrated against me even worse: is the evidence I have compiled over the years, shows this faction within Floridas legal system working cohesively together to suppress the evidence of their criminal behavior and to effectively being able to conceal their criminal actions of obtaining and maintaining convictions by any means possible...

The pattern showing a faction within Floridas legal system working together cohesively to obtain and maintain convictions by any means possible, amounts to criminal obstruction of justice! Which is legally defined as Racketeering.

My case conclusively brings forth overwhleming evidence showing there is a pattern of racketeering - and until a whistle blower comes forth in my case, the injustice I suffer will continue to be suppressed!!!

I need help, as I take advantage of this window of opportunity to tell my story and to be heard by a major media source - for as quiet as it been kept ABC - has played a role in covering up Florida's criminal enterprise - so it came as a major surprise to me, to see them allow this can of worms to be opened!

If I have peaked your interest/attention and you would like to learn more, please take the time to read my blog in detail. I will welcome any and all questions!
