

Isolation by causation

Greetings to the world abroad - I find in these troubled times that even in the most deprivation of lifes basic comforts - we still all have some common thread - some humanity we all relate to on a basic level.

What this Covit 19 Coronavirus has done is united many, brought folks closer, its also devided some. Being denied lifes most basic comforts, things we all take forgranted, will make us all as human beings- stop give pause to think of the way we take forgranted all we love about life.

When you open up and begint o reach out to folks in your time of tribulations is when your best side comes out. its in the face of adversity that our true character begins to shine.

I am contatly amazed by the stories i hear on the news radio, read about in news - of people giving, helping others. The folks who are puting themselves in harms way for us all to remain comfortable. Fed, Clothed, with lifes basic necessities.

Having lived in a situaction thats begining to feel like totalitarian rule- it should give us a brief view of what could be - if our world was to change forever.

The abities to feed our family, take care of all our needs, and our own entertainment is all effected. The virus has no racial or demographic boundries. It dosn't discriminate. It unites us all as fragile human beings.

The psychological effects of Isolation - are many and have many adverse effects on each individual. Some find it hard to cope with, feeling depressed, affriad or scared. Others can find ways means to keep themselves enertained, to take thier mind off the deprivation.

Indeed the current situaction of lock down - is very repressive. to be obbressed by some form of rule(s), rather its rule of law, or rule of nature. Its all the same.

Across the world people are kept in lock down - held against their will, by man's law, some by goverment rule, yet it is all a basic denial of human rights.

To be isolated - locked down held in isolation is meant to break ones soul & spirit. that human nature to fight. looking back at the begining of the use of a prison cell- it was profered in the USA in early colonial times by the quakers. The locking up of a heathen criminal to break his will his spirit. Done in order to tear the human psyche down - to reform to change the person. To bring them to God, to make them change to give in to or submit to the reforms of a society that did not understand what it had started - let alone the long term repercussions.

Having taken the use of solitary confinement to new extremes in the 1800's into the 1900's to date- its become a violation of human rights - that continues to date in may states, countries.

Cruel & unusual punishment comes in many ways, means forms...

What ever the cause of your deprivations - we all relate on a basic human level. Let my people GO !
