Subject: Georgia Bulldogs, or Georgia Guinea Pigs?

I am sincerely praying that this current gamble does NOT fail.

The President publicly "egged on" all States to move forward.

Georgia took the bait.

Now the President is stepping his comments back, clearly setting up the Georgia Governor to be the scape goat if this gamble flops. All as a test to see how the CV-19 will spread. Someone has to be the guinea pigs, right?

Lord, have mercy. May we find cures and medicines quickly. Bless our Georgian citizens. Bless the scientists, doctors, nurses, police and first line defenses for doing their best. Their blood, their lives, (Georgia) will be accounted on the Governor AND the President's soul.

We do need to open our economy - safely.

We are all anxious to get back a normal life.

So many people look to the President of the United States as a beacon of light, and hope and truth that will NOT needlessly harm. So many people are clearly desperate for a good leader, as am I. Trump offers the "non politician" way, but is it a leadership that comes with morals and integrity? The Democrat party only offers "politicians" as usual. The Senate and House, while some have proven true Patriots, but most have proven themselves to be "yes men" and weak individuals lacking any moral courage.

This Georgia experiment reminds me of the words spoken by Michael Cohen in his trial and testimony under oath. It proves his testimony was true. When Trump "hints" at something, you know that you must carry it out to stay in his good favor or suffer life destruction and failure. Yet he himself will take no responsibility for those actions...

God help us in our future...

The U.S. is resembling the Roman Empire more and more in her decline.

We are so close to a dictatorship. Why can my Christian brothers and sisters NOT see the truth that is right before them? So desperate are we for a real and godly leader that we accept anything, even a false demi-god.

Only Jesus (Yeshua Ha Meshiach) can give us truth and strength to stand through this.
