

Another Window leading to indictment

April 18, 2020, I just watched another television program (48 Hours) about yet another innocent man from Florida's death row - which makes three separate highlighted televised cases of innocence this year - giving credibility to my indictment of a faction within Florida's legal community being guilty of racketeering: by showing evidence of there being a pattern within this community to obstruct justice to obtain and maintain conviction by any means possible!

Counting these three separate, over three decade old cases and the documented evidence I have put together over 38 years of maintaining my innocence of any kind of murder - shows there are many other cases (besides these three and mine), to support my indictment of racketeering! Which is why my case being the oldest and most blatant of all these cases, continues to be suppressed by the faction within Florida's, legal community guilty of racketeering!

What is most disturbing, is the fact that this evidence exist and that the only people interested in my case are the ones succeeding at suppressing the evidence which indicts them of racketeering! If you read all of my blog post, you will see I have not been silent over the years, as I've struggled to find the help to bring my case to the forefront! So once more I am appealing to the court of public opinion for help to find an investigative reporter to assist in bringing my case to the fore front, by making my story news worthy...

If you have read this, please pass it on to help build an exponential movement bent on correcting the injustice I have endured all of these years.
