

## Love Note

7/30/20 My Dearest Love:

You and I have been part of one another's lives since we were kids. You are not just a part of me you are a part of my family. You are my sister's sister. I know without thinking about it that if they had to pick between you and me I would need to look for another family and I would have it no other way. I'm happy that my family loves you that brings you even closer to me besides you've spend more time with them than I have. Then Tim needed someone to confide in about his life back in the 70's he turned to you. You were always there for all of them. You were there when Teddy came home from the hospital in '64. You were always there for my brothers and sisters and all the friends we had made our family along the way and I love you for that. What I love you for even more is the way you've always been there for me. I remember every smile you ever gave me, every I love you, every joke you laughed at with me. It was easy falling in love with you when you were so young and beautiful but so you know it I love you even more today. In my eyes you've only become more lovely.

I'll Love You Always  
Forever + Ever + Ever  
Your Steve
