

Reopening of schools

Why so much controversy over opening of schools? Donald Trump is not helping the situation No better with all the lies cause clearly children can get Cov-19. There is 240,000 children that has Cov-19.

I just wish Donald Trump would let people do their job stop putting ~~his~~ his hand in everybody else lane causing more problems.

Right now I am so upset so upset with Mr. Craig the principle of North Paulding school. The over crowding of the hallway with student changing classes. Students wasn't the problem, he is because he is the leader in the room. Common sense says that he the leader should have been out their leading one class out at a time ^{making sure they get with the next period.} making sure they had on their face mask. But oh it's not mandatory they wear their mask what kind of foolishness is this. When 240,000 children already has Cov-19. Then Mr. Craig had the nerve to suspend the baby because the student was concerned about safety. Then gets on ^{intercom} ~~the com~~ announced if anyone ^{your} record negative things about the school will be suspended. Really ^{your} concern about about a reputation than the children and the teacher health. If I was the parent of this child. I would have made some noise because this is not right. Thirdly most principle don't do nothing but set in the office on their butts. Do your job - Direct that traffic in that hallway Get up off your butt and make sure everyone safe. Let that baby come back to school ASAP. Children should record things at their school that is not ~~to~~ right. That is the only way your going to get help and people attention

Final point school with hot spot should not send their babies back to school unless there are special conditions where they need to be in class. The one can do virtual learning let them. The space in the classes need to be small as possible in the hot spots of COV-19. This is my take on reopening of schools
