

More of officer leaving
fewer coming to work for the
force

I want to encourage the officers who are good. The community really needs you. Because there are people who are in the streets needs to be locked up. I personally don't believe in defunding. I feel the communication gap broken between police, mayors and community. Half of the mayors don't even meet with the police, sheriff to see what they need and how things are operated. I feel that is not only the trust broken but the communication.

To our citizen we have to learn how to ~~to~~ not destroy our communities. Just because you live in poor neighborhood should not be a excuse to ~~commit~~ commit crime kill, steal, rob, rape, molest, vandalism, graffiti, looting, arson, anarchy, malice with evil intent destruction of goods, property, harming, showing disrespect for the property or possessions of others. Just because you feel defeated don't mean you got to act like you defeat by doing things destructive because you don't care about the next. It's not about get it how you live it. What are you feeding your mind? Negativity who are you hanging around? negativity what are you doing? negativity. Turn that situation into positive Think positive Do positive

I want thank all the good officers for serving our communities
