

Does the people matter or winning the election matters more. President Trump

As we listen to the President. He was having shortness of breath. How is he fit to go out on the Campaign trail. Since President Trump is not fit. That is what a vice President their for to take over when the president can't do it. I believe that Trump is not thinking about his health which is more than a election right now. I am scared because he is the president. He is going to get a favor to be cleared to come out when he is not ready. You have to be fit in order to help the people of American.

When you're sick like that. Being tired affect how you think at the time. Prime example you said their needs to be no deal until on the stimulus until after election. But then recanted back said yes they need one now.
