

DEAR Outside World:

12-7-20

Ding Dong the witch is dead! The people have voted and Trump is now a one term president. Hopefully, elected president Biden will get this Covid-19 under control...

Trump should be put on trial for Genocide with the "HERD IMMUNITY", for allowing Covid-19, to go unmanaged. It's all about population control, and practicing an elderly population of people that are not productive members of the work force. It cost the government more to take care of the sick and elderly than they are worth. Trump is allowing our elderly to just die. Shame on you, Trump...

How many of you have experienced Covid-19? I just had a battle with Covid-19, and it was a very unpleasant experience for me. First, I had this dry cough, then a fever, a pounding headache, and lastly I lost my sense of taste and smell. For about five (5) days I felt like hell, and the thought of dying in prison of Covid-19, was even more painful. But the warrior in me would not give into the virus, and I ended up defeating the Covid-19.

There is no worse thought than that of dying in prison at the hands of something that you have no control over. You have to depend on faith and hope that your immune system is strong enough to fight it off. I'm strong but human.

I wish everyone out there a Happy New Year 2021. Please keep safe and wear your mask!

Strong but Human!
