

"Covid 19"

The virus has finally gone rampant in this Prison. The death toll is not know by this writer.

I can see why it has expanded so fast. It is not being taken seriously like many groups in the free world.

The guys socialize when they come out of their cells for medication where social distance is ghostly at best. The guards too do not wear their masks all the time, and some of the inmates wear their masks while exposing their noses. And then theres those that exchange hugs fists bumps. Social Distances is rarely observed.

We should all be isolated 2 in cell being fed in house and medication delivered to our door. But none of these methods are being practiced.
