"Covid TAKES ANOTHER"

Recently one of our prisoners died from the virus - His property was rumaged through by officers discarding papers and open products (ect) His property was placed in containers and placed in a storage room. Later on in the day 2 inmates were allowed to go into this room and take the dead guys canteen giving no thought to the dead mans family. These items should not have been given to these inmates - But they are treated differently from other inmates because these inmates are rats. They alert the cops to whats going on in the building. Still this should not happen as its really disrespectful to the dead and the inmates family probably paid for the items of the deceased man. Even in death prisoners can't escape the states iron grip.
