

Cor-19 Now or Never or too Late

First off I want to say ~~you~~ Thank you to delivery services, first responders and everyone who is making our lives easier during these difficult times. Thank you to the filming industries, movies and musician who has been putting out music. Thank you to the teachers and parents who are helping the kids with their education and ~~copying skills~~ coping skills. Thank you all who are following the CDC guidelines and listening to the doctors and scientists. I am very disappointed in the ones who keeps disobeying CDC guidelines. Such as the ~~or~~ supporters who came to hear Donald Trump going away speech ~~at~~ ⁱⁿ inauguration day. all 200 people stood there without a mask. That sicken me to my stomach. Just recently two family members got it from a church service. Even my little niece has it. Guess what Everybody at church service is got it. They had on mask but what went wrong. All this bunch up, touching, not practicing left not wearing mask. Some places we need to stay out of. One of the ladies in the church this is a second time have it. I am tired of seeing on the news somebody in the hospital saying they shouldn't not went to such and such or they should have been wearing my mask. you need ask ~~your~~ yourself do I care about my life. Why is it so hard to obey simple rules? In order for our nation to solve to be healed, you are part of that process - you cannot put all the responsibility on Joe Biden, Mrs. Harris, Republican or Democratic when the citizen in our country (America) is not doing their part following CDC guidelines. You want to see the death of Cor-19 go down - change your negative behavior into follow the CDC guidelines. In order to solve a problem lets not be part of the problems people. Come on now. Let's dare reason together (Obedience CDC)
