"FROM THE INSIDE LOOKING OUT - OMG!"

Let's talk about some of the current events. It's as if everytime I turn the television on, there's some crazy stuff occuring in our nation. Just to touch on a few:

ASIAN AMERICAN VICTIMS: Throughout the United States there has been an outbreak of violence against Asian-Americans. The elderly men and women have been attacked so bad that they've suffered black eyes, broken noses, multiple injuries causing numerous sutures. The children are even frightened to go to school, fearing they too may be victimized. Who are we to blame for these brutal attacks? For some, they blame the Asians because the CoronaVirus originated in China. Though if this is true, will the act of violence cure the virus? Will violence bring back the loved ones we lost due to Covid-19? No, it will not! Violence ONLY creates more victims...

MASS SHOOTING: Just imagine going to a grocery store to purchase food for the family and all of a sudden some mad man walks in and starts shooting at every human-being in sight? Well look at what took place in Boulder, Colorado; for no reason whatsoever this individual goes on a shooting spree, inside the grocery store, killing ten innocent people to include a police officer. And again, who are we to blame for this deadly attack? Is it the CoronaVirus, the Pandemic? Why would this individual go and commit ten acts of murder? Any and all violence toward humankind is uncalled for!

CORONAVIRUS: Our nation is in fear of another surge. We possibly have four variants spreading, to include California. We're aware of the U.K. variant already being here in our state. The CoronaVirus Pandemic has taken a toll in the lives of many, to include stress, broken relationships, loss of career and other overwhelming factors. Just recently, the Spring break party goes in Miami, Florida caused a 'State of Emergency' due to outbreak of violence. Also, a surge of 4,000+ positive Covid-19 cases because some refused to protect themselves by wearing a mask during this celebration. Really People...

Nevertheless, it is our sole responsibility to become part of the solution to all the madness in our Great Nation. We, the American people, are the solution to all that is and has occurred in this country. Remember, our voters are the

people who have placed those elected officials in the Legislature, Congress, and White House. These same voters elect local city, state and federal government officials; providing them the power to establish the laws we must abide by. I explain this to say, "We must come to a clear understanding that we need to work together and not against each other, to bring our country back to its normalcy!"

My fellow citizens, I clearly see everything before my very own eyes, every time I turn my television on or I speak to somebody from the outside world (not incarcerated), as I currently am - I see the need of 'sense of security' and/or expressing love and compassion toward humankind.

Your time, patience and input of what I write and submit on my blog site, is very much appreciated. I look forward in hearing from any and all of you who have taken an interest in my submissions. Thank you, God Bless and stay safe & strong in everything you do!

Respectfully submitted,

Librado Clemena, Jr. J-94579
