

CALL TO ACTION

If you're a regular reader, I recall that after my birthday in 2019 I wrote about having a weird experience and being inspired to start a new program with the BOP.

I sent the enclosed proposal to Ms. Dukes in late 2019, but she said she was busy. I emailed her twice during this past year's lockdown/quarantine, with no response. I was recently able to speak with her, and she said that she's gotten a new job and they haven't filled the Re-Entry Coordinator job yet.

So... I take this to you, dear Reader.

Pardon me for saying this, but I think this is a good direction for prison reform - to make it more of a job training institute.

As I mentioned in my notes, you could have (staff supervised) interviews via Skype or some other software. The staff supervisor could give interview reviews/tips after each interview.

The BOP Central Office could set up a database of BOP-friendly companies who will hire inmates, and other resources for the whole country.

The TLC's are a perfect set-up for someone

2

who has nowhere to go when they get out of prison.

If I were released now, I would not be allowed to go to a halfway house in Florida. I would be released to the streets with nothing.

I can set up a program where each inmate has a job, a temporary apartment, and a portfolio with doctor references, grocery shopping, public transportation - everything you need to restart your life.

If you agree with my proposal, please cut and paste the Proposal and forward it to your Congressperson. Please DO NOT include a link or anything to my blog as I would be retaliated against by BOP staff.
Thanks!
