THE HORROR OF IT ALL

Well the South Carolina Supreme Court has stopped/postponed the killing of Freddie Owens. Yes just long enough to make sure he can decide what way he desires to be murdered. Does he want to be fried in the electric chair? Or shot through the heart? And yet we see our President, talking to Russia's President Vladimir Putin about human Rights?! Yet here we are making a man choose the method of death that he would like to be murdered by. And we don't see the absolute horror and insanity that's taking place here in America? Think about it! I'm going to kill you, murder you! Please choose which method that I'm going to use to exterminate your life?! Yes America has taken insanity to levels that are beyond belief!! What is wrong with this country? With our leader's? With our court's? The morals and principle's of this country is surely not evolving with the standards of decency that the law and constitution requires. Find me one convicted murder who has cages their victim or victim's for years, with the imminent imperial of death, and then gave their victim a choice of how they will die. Show me one! Yes the inhumanity and pure madness of it all. And America thinks we're better than those we murder. We think we're better than Vladimir Putin? Yes we're telling other countries to conform with our moral's and principle's. But when they look at this insanity!!! What must they think? Cause anyone and I do mean anyone who sees our death penalty, has to look at us and just shake their head in disgust and disbelief! What are we thinking? God have mercy!! And yes its up to us to stop this madness! This horror! So continue to fight and make a difference. If I can do it from inside this cage, you can do it from out there. So fight the good fight and be the voice of those who are enduring America's madness. God bless you.

Sincerely Ronald W. Clark Jr #812974
