"THE HYPOCRISY OF PRESIDENT BIDEN"

One of President Joe Biden's campaign promises was that he was going to abolish the Federal death penalty and give states an incentive to abolish their death penalty. My oh my how these fly by night promises turn to hollow words and empty promises. For here we are six months into the Biden Presidency and his administration is trying to get the US Supreme Court to reverse their decision in Dhozkhhar Tsarnaev (the Boston Marathon bomber) case. So much for meaning what you say, and saying what you mean. When I seen that bombing I want lie, it angered me. I want even try to deny that I didn't get mad. I was sick to my stomach seeing these senseless deaths and injuries. But killing this young kid who was blindly following behind his older brother who was indoctrinated with hate, does absolutely nothing to bring back the victims. It will not bring forth closure and healing. Really the only thing it will accomplish is reopening old wounds. And in return victimizing the Tsarnaev family. Who will moron the death of a second son. What about the Boston Marathon bombing victims? Okay so what do they get out of watching a human being be put down? If you can find healing in murdering another human being under the false pretense of Justice, then you need some serious mental health counseling. Because true healing will not come, and should not come through state sanctioned homicide. But President Biden need's to stand up and have his administration stand down on this. And live up to what he said and abolish the federal death penalty. And give these States an incentives to stop murdering their American citizens. We need people to speak up and speak out letting President Biden know that we don't appreciate him back tracking on his promises. For he should stand by what he says, yes mean what you say and say what you mean. Change is needed here and now. God bless you all.

Sincerely Ronald W. Clark Jr. #812974

"DEAD MAN WALKING"

Dead man walking
that's why I'm talking
trying to educate
to eliminated the hate
and rid so many men
of a terrible fate
Killing our citizens
watching them die
this is what I'm here to testify.
Yet this here I don't deny
some should never... never be free
but the death penalty should not be.
For mistakes can be made
and the ultimate price paid
for when an innocent life is lost
that is surely the ultimately cost.

And we can never never be sure
if we're killing the guilty
or just the poor.
