

## Delta Variant

Why I don't understand is how these viruses keep coming to United States from these foreign countries. First covid-19 now the Delta variant. We ~~are~~ supposed to be secure as American. Can somebody help me to understand how this keep happening to the American people. This is problem number one. The second problem. People why won't you get vaccinated? We are dealing with are dealing with a deadly situation with covid-19 and Delta variant. Do you want to live or is you ready for the ~~close~~ pressure close you leave this earth early? Donald Trump is no longer in the white house. It had to say that because some are still making it a political situation. When it is not. I am still trying to figure out who is a right and left wing. As I've said in another writing. All I've ever known is Democrat and Republican. Is fox news even going to stop slamming the democrats. Donald Trump is gone but we still blaming the Democrats for everything. Whether you are Democrat or Republican we all in this together. Nobody has time for political fighting. We need people fully vaccinated. It's going to take not ~~to~~ just the Democratic to get them in their. But the Republican, local leaders and the people in these ~~community~~ communities. Listen to me people - all over the world this has nothing to do with politics. This is concerning your life. Do you want to live or die. Hurting the ones you love if you die. Think about this people. I wanted to live. I received both of my mRNA vaccination. It worked for me. We got to come up with something to help the children that is not old enough to receive a vaccination for covid-19.

People please leave Politic out of this go get vaccinated. Mask up, wash your hands and make sure the people you are around are ~~the~~ vaccinated. Encourage others to get vaccinated.
