

## Sublime existence

As a prisoner of the state of Tx I have suffered from Coronavirus. Tx failed to vacinate its prisoners in a timely manner. The Govonor had indeed stated in January 2021 he would not give it to prisoners. After a outbreak on a massive scale - reciving negative media only then tx took action. In April!

The duncan Unit tdcj ID unit suffered the worst numbers of covid deaths nation wide! it was the first to recive a 70% vaccination rate.

In comparison Polunksy has now only reached 66% and falters in its covid cleaning protocal, its application of sanitizing area's per directors policies.

It has allowed us to suffer from covid, failed to protect us. Less than the least of us. We are the forgotten the nameless with a number.

I feel that I suffer from Covid brain fog. I attempted to work on my case as it went right through the 5th circuit and into supreme court. I missed the rookie mistakes made by counsel. It falls on lead counsel at the end of the day to check all filings. not only to check but to review the standard of review by the courts.

AS USSC Justice Kagan pointed out the 5th circuit failed to review under the due diligence standard, should of given me a hearing. having misapplied the law - I wonder how my attorney missed it. Well at the end of the day He to had suffered from Covid. I fault the whole process as being tilted against the prisoner. It is a system titled justice, but there was nothing just or deserving of a failure to uphold my basic rights under the federal statues, the AEDPA federal review is full of baring us, hurdles, pitfalls and stipulation to stop appeals from moving forward.

My faith in humanity was dashed once again as I read how these mistakes should of granted my appeal, goten me past the procedural bar and been granted a hearing. But at the end of the day justice wears its blind fold well.

I dissent from the acceptance of a faulty death penalty system. I am confined to a cell 24/7 months on end, turchured without a shower, not even allowed to baith days on end. I call upon the legal comunity to pool its resources as federal law mandates us prisoners held in solitary confinement recieve ONE HOUR a day out of cell. its been months on end - of turchure. In clear violation against the 8th amendment ban on cruel & unusual punsihment. 10 state sued since 2015 and won having taken their death rows out of solitary - but this is texas the harshest tuffest state. I wonder how bad things have to get before they improve?

Disgusted on tx Death Row.
