. " THE FDOC AND THEIR VICTIMIZATION OF FAMILIES "

My mother drove by the prison today and cried. Yes she cried because this administration will not allow her to see me over this minor DR that they clearly orchestrated to suspend my visit's under a rule never used before to suspend anyone's visitation. Even when I tell the staff what happened they can't believe my visit's were suspended over a minor ten day DR. But leaving that a side. When your retaliatory intent is to harm innocent family members. Well to me you say an inmate is a low life, well those type of actions puts you beneath an inmate. I can tell you this, I wouldn't cut off the family ties from the officer's here. But this administration would. Not only would they!! But they have by forcing these officers to work 16 hour shifts. Yes by doing that their depriving these officers from watching their children grow up. Spending time with their wife and other family. So when the administration doesn't give a damn about their own staff, why should they have any sympathy over retaliating against me and victimizing my 74 year old mother in the process. And this is the problem with the FDOC!!! We need an overhaul of these top administers, who currently would be better suited for a Neo Nazi concentration camp! Because truly these people are low life dictator's who want to inflict pain and suffering upon innocent families! And if it takes victimizing an innocent citizen to harm an inmate, so be it! You would think that they had more compassion for the families. But I guess compassion isn't in their job discretion. When you get your kicks out of making family members suffer, that puts you on a scale all by yourself. And that's exactly what they've done. And that's exactly why we need change! And why I'm engaging in this hunger strike fighting this. I know of several other family members of other inmates who these people are also victimizing outside the rules and regulations. But those guys aren't willing to do this. But one of the families is the Jackson's who have been denied visits for three years over a \$20 bill found in the visiting park. Four of Jackson's visitors were suspended over that incident. So for almost three years without any evidence of wrong doing they've denied those four family members contract with their loved one. So yes we need change!! And we need it now! Be the instrument of change. God bless you.

Sincerely Ronald W. Clark Jr. #812974
