Hi Julie,

Yup, finally able to ask you for that Audio disc I've been talking about since day one. Yep, now I can focus on singing. The first 11 songs can be downloaded in MP3 from YT. The next 5 songs are already in MP3 from bandlab.com. The next 5 songs are at your old shoebox, @ photos, can you make those MP3s? The only way I know you can is if you post them on your YT and then download in MP3 format, hope you do it because I also will need that stuff later in MP4 video format because yes we are opening a new program here and will be filming live sets, so the media center cats here will see that we've already done most of the visual works, so please post up, but for now the MP3 audio versions are what I need on this requested disc.

The last set of videos that I'm requesting to be put in MP3 is what I'm calling "22 A Boogie Type Beat". Curves - & about 67 more beats @ Google Drive. One program includes audio check outs, where we check out a disc, choose as tracks, and perform for singing, spoken word etc at next session, so this requested disc is my own special checkout of performance tracks and beats, and finally a disc I can listen to in the 24 hours a day, and so I'm enclosing the selections list from the Attorney's Google Drive, all selections came from your Podcat, you already have these. Just download each video into MP3, and Bam, all are also at YT, so MP3 reformat can be done there as well. The disc you've sent also hold thousands of MP3 songs, so just use a disc you already have, and the requested disc - Sticker request also enclosed. Send finished disc to Attorney, so he can get it to Dr. Sam Robinson for us.
