

All or none or for or not for

We live in a world of shaky political foundation whether you going to be all, ~~more~~ more or for or not for the American people. When I am playing spade, I got the big joker, small joker, Ace spade etc. I am going to use them to win. What about other Americans that play spade like me. We know our game. We play to win. So our political system is the same. But when you have people in the political system that are 3 of clubs, hearts or diamonds you will never win. Such as Joe. I am tired of people like that being in our government that are hindrance to our American people and president getting things done. Some instance about the gas prices are steadily going down. While the nay sayer criticize President Biden.

Some people don't even know how to play spade. So they can't recognize our Ace of spade that we have as a president. So if you don't know a winner when you see one why not kept your comment to yourself. Nancy Pelosi is my people, just as ~~Hillary~~ Hillary Clinton and Stacey Abram. Georgia needs a black governor for a change because Georgia has always been a racist state. Some counties has all whites running everything. Those white individual will gain up on African American whether to jail them or violate they rights.

Georgia has a bad ~~reputation~~ reputation being racist. It's not all whites the problems. But the African American Community as well. Have you ever heard the saying if you can't beat them join them. So our African American go along with what is wrong in the

government by sending their own color down. My dad was born and raised right there in Bambridge, GA. My dad has seen it all. He said he will never come back to the racist state. He would rather stay in the state of New Jersey. I don't blame him. I wish I would have stayed in New Jersey where I was. Everything supercede the negative about Georgia.

There are so many civil rights being violated in Georgia so many ways. The cases are Kumonguo so people are just sitting in jails and prison. Are being denied services that they are entitle to from the government but not treated fairly like everyone else. Prime example I received my \$1400 stimulus check. But my \$1200 and \$600. They claim my income tax form was wrong. Then they said I had made over \$100,00 which both was a lie. Beside myself I know alot of people who in the same boat I am with our stimulus. The government say we was entitled. Some people received all their payment easily. Why is it (we) the other people having unnecessary issues that we had no clue about from the IRS.

So having the right people, right plan and right person in the position in our government, matters. One thing I cannot stand about any position in the government. I am not talking about corporations or private ~~own~~ ^{own} ~~company~~ companies. I am so tired of campaigns or people who gets in the office. They had a family member in that position before. For example in my county Dad and son has been the mayor. Come on people what difference your going to bring that the other relative didn't? American government should not be ran as a ~~own~~ ~~company~~ family corporation,

for real.

The next point I want to bring out is about the American people who are the voters. How the ~~is~~ Sam Huel you would want Trump run for president again. Do you not remember the insurrection and the all the chaos in our government. For heavens sake think about our Senators and government officials who got killed or hurt or could've been hurt. The things happened before he got in office and during the time he was in office. There was some sad situation happened. We don't promote violence and racism in the United America. The foundation of this country wasn't built upon that people. We got to break these cycles in the way vote and live. Why anyone want to see chaos and violence in anywhere or vote somebody in that would promote that.

Our forefathers didn't fight for us to be repeating the ~~cycle~~ same cycles over and over. So let me ask you a question voters. Do some of these problems we having in the government leader problems or yours. Some of the ~~city~~ cities in the United States are becoming the most violent ones. Why is that? Could it be because the poverty rate has went up so the crime ^{rate} has become more prominent once again. Or could it be the upbringing of our children or the environment we've created for them by the neighbors ^{poor} we stay in because of poverty.

Let's leave the Defund the police out of this important argument or debate. Because we know we will always need law enforcement. For the reason you can hire as many law enforcement, build as many jail and prison as society want. Which is more costly. ~~be~~

Prime example Georgia has the most people in jails, boot camps and prison. Some of the same people come to prison over and over. ~~•~~ Those same individuals at least some of the career criminal has been more than 25 times. What was resolved. Nothing, then some people has been locked over 25 years that probably would never offered ever again ~~but~~ because they have been locked up so long that is the ^{farthest} ~~farthest~~ thing from their mind but end up dying in prison because they never given opportunity to show they have change.

The violence in the street somebody's foster child, adopt child or runaway who never felt that love they joined the street life, gang or drug cartel. To feel accepted ~~to~~ and for the money. In this world we have so many children that has been abused physically or sexually. That never felt true love from parents or parent or adopted parent or foster parent. So now they are adults that have been emotionally destroyed so bad till they don't care about nothing or no one. I look at what happened to these individuals when they was young cause them to make the choices they are making?

This has nothing to do with our leaders in the government. It has to do ^{with} what was in those individual lineage growing up and how did they get on that path, people? I ~~too~~ have notice men and women that is locked up. Most of them want to be excepted and loved. So they found in the prison gangs, homosexual lifestyle ~~and~~, robbing, violence and ~~rape~~ rapes things that they would have ~~are~~ never done on the streets.

I had talk with my peers the other day? We was wondering how much the prison ~~by~~ lifestyle ~~contributed~~ of homosexual contributed to the high rate of homosexuality today. Most people would say well when they made the same sex marriage legal - we felt better about coming out. Is that really true? Because my two uncle was open with it before. Both are currently deceased one died from aids and the other one died of alcohol poison last year.

Even though we have a covid and variant pandemic. What about the aids crisis in American that is ~~plus~~ taking over the LGBT community. The men prison is full of it. The women prison is full herpes, Hep C. Just within itself, is a pandemic. I just feel that people - individually is not trying to help themselves. Even with the violence going on the community. Those individuals that are the perpetrators has to want the help.

Another thing I want to bring up. Why American not wanting to drive ~~the~~ trucks anymore. I don't understand why not work and take of your family. I just was telling my family. Most people who lived in poverty don't see no other way. Such as my family. I've always been the black sheep because I would always find a way to be prosperous. There are plenty of opportunity in the world but we as individuals has to take the first step. We can only do that for ourselves.

Summary of this writing you either for change or not for change. There is no middle ground on this.
