

## The torment of another

I have a issue that maybe someone can help me from the free world to resolve. The article is not meant to tear staff down at Pulaski because our warden is a good woman. She help me to get my medical appointment. now I have my medicine. This issue happen before this warden now it has escalated into bully from other inmates and health issue. I could grieve but who am I going to give it to. So now, this issue has turn into deliberate indifference against me. I lived in the honor down at Pulaski state prison. When you move in you sign a contract. resident rules. The first rule on the contract says as an Honor Dorm resident, it is expected that you are mature enough to settle problems among yourselves. If the issue cannot be worked out among you, speak with the Honor Dorm Counselor, the Deputy warden / Care Treatment or the Correction staff. But when you do try to solve your issue amongst the inmate it doesn't work because on A/B side there is a lot of ~~Bully~~ Bullies. They are controlling with the TVs, room or their inner circles. When you open your mouth. You are either ignored or moved out of the program. It's a lot of favoritism with certain inmates and staff. Prime example I lived in room 118 with a inmate named Michelle Pratter. I never knew she had a problem with me until people told me. She is trying to get you moved because she don't want you as her bunkmate. Then I notice she started bullying do this and don't do this about the cleaning rags. One morning was on the toilet really using it. She told me to cut it short because she had to use the bath room. The bullying got worse she had people watching the room. Coming laterally to see what I was doing. Then all kinds of commits was made about the ~~warden~~ warden ~~that~~ who was before this one we have new Pratter was working on the front lawn. This particular day she came in to torment me. I am going to sleep. So my plan was to ~~clean~~ clean my locker for the audit. that was next day. which she was suppose to be on her detail until certain. It was like she did what she want and still do. She came into room and started threaten me. They say you are smart but you ain't smart than me. She acted if she wanted to hit me. Called me trash. I said your not going to bully me. I ~~closed~~ closed the door for court. I thought that was what I.

Suppose to do. She made in a seem. I am not going in that room with her. The officer said your going to your room or you going to lock down. So she come back in the room. The whole time she was threaten me saying I pick the right day on the right officers. When I didn't do nothing but lock the door. Michelle Pratter said oh you going to move out of here today. Lebit till I go up front. She said you mess with the wrong one. I am going to make your life living hell. This inmate Michelle Pratter went up front got me moved less than 20 minutes. I moved to a top bunk. I have asthma since I been on that top bunk my asthma has acted up ~~more~~ more than ever and back problems. Medical is not helping they said they only give secure patient bottom bunk profile. Back to the story when I seen the Deputy Warden at Kainis she said the upper staff did that. But when my letter got intercepted. I got called to the office by the pass Warden to question me about the letter to the Commissioner. She call that Deputy Warden she said that she told me the counselor moved me. But here is the problem with this what make Michelle Pratter special because she has gotten rid of plenty of bunkmates before and after me. All because she worked up front. She don't work up there now. But this same Deputy Warden favors this inmate by putting her in another good detail after another incident came up. Every since she had me moved the other inmates started to bully. It's hard to get a TV because the day area TV is Pratter. Tonight she came out somebody needs to clean this table. I don't care who it is. This inmate acts more like a staff than a inmate. Everywhere I go in this building inmates felt the need to bully if I ~~tried~~ try to defend myself they go tell staff that I start argument or I am always the victim something Pratter said about me. Now I have two bunkmates that are bullies Tiffany Scott and Latilia Hutchins. I've complain to the counselor/officers about them because they have been trying to harm me with the blow dryer and doing anything to keep me out of the cell. The Bullying has ~~get~~ gotten stronger. They know I have asthma. They run their hand dryer on high for the heat. Then I been out of asthma medicine but I have it now but these blow dryers is tearing me up nobody is taking my condition serious. The roommate are mean especially Tiffany Scott. They heard me on numerous of occasion grasping for air on my top bunk. one bunkmate Latilia Hutchins just look at me and Tiffany Scott said Hum. January 11<sup>th</sup> had a severe

Asthma attack went to medical ER where I had a breathing treatment. When I came back to the dorm Tiffany Scott and Latilia Hutchins still had their blow dryer on high. I could breathe again. That night I could have died. We are short of officers so anything goes with some inmates. They are cruel and don't care about another inmate's life. January 21 I suffered another asthma attack because of their Blow Dryers. They did the same thing one just looks at me grasping for air while the other act as if I was disturbing her sleep. January asthma attack ~~threw~~ throat swollen up. Friday ~~throat~~ throat was still swollen. I ask the officer could she call medical cause my ~~throat~~ throat was swollen. She told me that they would probably tell me to put in a sick call and the other officer said I have asthma - went on with medical. Nobody ~~call~~ temp to call because these are some of the same officers close with Michelle Prather, certain gay couples in the dorm. It's basically like whoever ~~is~~ Michelle Prather and Tiffany Scott has a problem with whoever they friends with better have a problem with gov. But when comes to my health and reputation and the bully. This is serious I have to speak out. What ever Michelle Prather told them people to moved me. They are sticking to it. I don't understand how you can move another inmate off another inmate's word and continue to punish that inmate. How can inmates like Tiffany Scott, Michelle Prather and Latilija Hutchins think it's and 131 their apartment nobody else ~~is~~ allowed ~~to~~ to live in ~~them~~ their. Out of my 25 years I have never ~~seen~~ seen inmates like this very comfortable till they torment another inmate. because they feel like the cell is theirs, the officers are their friends, and their friends is only their friends. Anything happens to me in my sleep I stop breathing or I died of asthma ~~at~~ attack it will be because of them blow dryer Latilia Hutchins

and Tiffany Scotts. I said I am tired of being bullied. January 26,  
I ask the officer can she please ask them blow Dwyer off because  
it's trigger my asthma. Tiffany Scott started to ~~curse~~ curse at me. I  
didn't say one word. The next morning she got loud in the day  
area since I am a bully I am going to show her. Everybody on  
the hallway can go in their room take a nap or use the bathroom.  
I heard a conversation between Latilya Hutchinson and Tiffany  
Scotts she Tiffany Scott asked had I been in the room. Latilya  
said she been out on the hallway. Then they continue to talk  
but Latilya hurried up in shut the door. At all times they  
make sure one of them are in that cell. I've told the ~~lady~~ <sup>Counselor</sup> over  
the dorm about the bullying and the health issue they creating  
on me but as I said Michelle Prather started this mess and  
now things are going to far. Somebody help. I got to speak out  
Things has went to far with these inmates and the situations  
Could you please make sure I am harassed, Shipped from this prison or  
retailor against. My current circumstances in my cell has been reported  
to officers <sup>and</sup> counselor over the dorm. Nobody will do anything to none  
of these inmates. It's as if they are touchable. With Michelle Prather she is  
cool with the Deputy Warden of Care/Treatment. Basically it seems she does no wrong  
in her eyes.
