"CELL INSPECTION"

Judge Marcia Morales Howard issued her Order for this administration to have the day rooms up and running today. Well not only did the FDOC and this administration thumb their nose at this U.S. Federal Judge, treating her Order like its some type of joke. But they come through at approximately 9:00 am with a dozen or more officer's doing cell door inspection. Then they've got another officer passing out a memo on sheets and pillow cases and the manner for which they want them sent to the laundry. No telling how much money they squandered on that little project. But then to beat it all, they come through doing cell inspection. They've got several assistant wardens and several other white shirts that consist of Captain's and Lieutenant's. Think about this for a moment. They could have used all these officer's to comply with that Court Order. Which that violation is going to result in fines of thousands of dollar's, for which Florida tax payers will be footing the bill for. But let's look a little deeper into what just took place. This " cell inspection" where the only thing they do is walk around trying to look important while they make us stand at attention, in class A uniform, bed made property put away. Think about the hundred's, if not thousands of dollar's they just spent on this dog and pony show. You've got the highest paid staff members in this administration, walking around in an absolutely useless show, that accomplishes nothing other than being seen. And to better prove my point, well you've got several screens that are barely hanging up other's that have holes in them allowing mosquitoes in here. Some of the screens like the one in front of cell 5106 is even hanging at an awkward angle where there visibly noticeable. Not only are they hanging at this awkward angle, there filthy! You can see dust and debris all in them. Not to mention trash that's laying up on the catwalk bars and the spiderwebs. And then we've got juice that's been spilled in the hallway that's drawling ants from a hole in the wall of our day room. And this spilled juice and food is a result of poor sanitation where they don't sweep and mop after each meal. And on top of all that your violating a Federal Court Order for which your about to get fine for. It is so absolutely absurd that its comical! What are they thinking? If I was Judge Marcia Morales Howard I know what I would be thinking, I'd be thinking that these people just disrespected the hell out of me among other things. But as I've stated, this is the FDOC at its best, or worst depending on how you look at it. But this is prime example why we need change.

Sincerely Ronald W. Clark Jr. #812974
