

Inflation - Is you committing Daylight Robbery?

Daylight robbery - a practice of charging very high prices. I believe this is a misunderstanding that seems to fly in a economy like this, where price levels are dictated purely by the level of money out there. This is Daylight robbery to charge people in our society high prices based on the inflation. Suppose people stop supporting the price fixing?

Based on the average person knows a normal economy will drive a overall demand. For example, a high demand brings more jobs, profits and supplies. But a low demand is because of unemployment, low profits and supply demand. When the low demands is present it can lead to inflation. Depends how long the economy stays in this position before it can lead to Deflation. The main point here is: Don't let nobody rob you of your money because we are in a inflation. Every business needs people and their money.

All these corporation, businesses and individuals are founding a opportunity to get rich off people who are already struggling. Just because we are inflation, don't mean you as a landlord boost someone \$1700.00 This happen to my daughter, who is a single African American School teacher, and

going to get her doctor degree. I was livid because she had to move in with her dad. Cause she couldn't do this ~~on~~ ~~her~~ ~~own~~ own. This is evidence people who are working just barely can ~~meet~~ <sup>meet</sup> ~~meet~~ their own needs.

We got to turn this foolishness around. Stop finding a reason to get rich off someone ~~else~~ else pain. This stuff we are suffering in this world has ~~become~~ become verratted. When you fall the rich study prospering. But if everyone would put a check mate on these people who are doing this. ~~an~~ Stop giving them money for their business and houses etc. Personally boycott, these places. I bet their song will change with all these pree taking.

Next our supply demand is low because people dont want to get off their butts or go to freakin work. Real work consist of taking your buttocks to a job that pays a paycheck. Get off these blocks, stop coming to these prisons and jails or ending up in the graves because you want to be the thug of the block, the baller, shot caller, like word is bond. Enough is Enough.

Where is the morality today in our society, man and government is not going to do everything for you. Yeah leave you out in the cold or a freakin cell. We need ~~to~~ to

move butter in this world. Stop selling yourself for the shorts. Real money is created through your own craft. What ideas that you can bless the world with? Word is bond. Stop selling yourself short one again. We've had that hot mess where it is. Jail ~~and~~, Prison and graves aint worth it. for real yo!

Cause man is going to move on to the next victim to lock away. Leave also the drugs and alcohol where it need to be left, alone. Get on the right track and stay. Get a job and learn how to be responsible for your life. Majority of the people locked up. All they know is the street life. Word is bond, lets change that.

Cov-19 didnt put us in flatin totally. Laziness from people. The ~~comple~~ comfortableness enter as people set home or work from home during Cov-19. It's time to get off to work and stop sitting on your ~~hands~~ buttocks. Many people didnt go back to work because they got a higher paying job. Which is understandable. What about the other half waiting on a hand out. Is that right? absolutely no.

We got to get these supply demands up. Truck drivers come forward. We need you all. People all over the world lets get back to work so our economy can be built back up as well our supply demand.

So our nations can prosper. Because what we are victorious not defeated. Our names is not defeat. It's victory. Change is evident when you put your hand to the plow. Someone who read this may say she is angry. But that is far from the truth. Guess what somebody has to be the realist in the world.

People has gotten so lazy. Doing the same thing but not getting no different results. When was the last time you had a total victory over a situation in your life? I remember buying this t-shirt at the beach that said life is a B\_\_\_\_. No people makes life a B\_\_\_\_ or our poor choices in life does that for us. Nobody is perfect we can all do better in life.

The world don't have to swallow us up. We allow it to because we choose to be depressed etc. When we get up in the morning, we can choose what we allow or want allow. Everybody writes their own story to their life. Whether its good or bad. That is your choice.

Inflation is not only how the government handle the economy. Every citizens has a choice in the matter as how they going to handle their life. Its time to search identity of who you are in this moment. Now get to work. Those who are able. Get off these streets ~~and~~

just wasting time on the block doing nothing.  
why would you do this, because your name  
is victory not defeat, my brothers and sisters.

Love ya
