" The Mitochondrial Movement ".
By : Ras Atum-Ra Uhuru Mutawakkil
(Mr.Norman C. Green, Jr)

3/16/2023 ©\®™

Tagline : " Paradise lay at the feet of mothers ... If you want to teach one or two children
teach another , you want to teach a
village , teach a mother or woman ".

1. Every major movement or dynamic that has moved the flow of people on this earth , can be traced back to a mother or

strong woman on the scene. These hidden forces or ' figures' , or over looked dynamics , played subtle catalysis or not

so subtle role in who we are today ; and an essay of this girth really can not serve the justice such undertaken demand , so

it will merely serve as a nod to the contributions that were made .

2. Women like Queen Hatshepsut(1502-1482BC) , Maryam (Mary) , are fairly well known to most , but you have other

mothers / Women who are not as well known , for example : the mothers of Prophet Muhammad (S) , Shakyamuni's mother

both saw prophetic Visions of their children , and even Mary's mother .

3. Nefertiti with king Tut , to Malcolm x and MLK , we see the strong presence and shaping of the young-man ; one such one

that is greatly overshadowed or even omitted is the black Umm(mother) Usama , aka known as Barakah , who took care

Muhammad(s) when his mother died ,and he also called Barakah his mother .these two women are the skies that Islam

slid on into this world ;

4. The Names of many million more women have been lost or whited out of history , but the mitochondria facts and proofs

don't and won't lie , we just have to bring them to light .

5. when Muhammad (S) said " Paradise lay at the feet of Mothers , he spoke the roles women have always played ,

just as the great African Proverb say : " If you want to teach a village " , you merely need to teach it's women , for the

mother ,sister and wife has the greatest influence on all children .
