

The Double Clause of social problems
that is enlarging itself against
humanity - what is worthy
anymore (which stories)??

The concept of news work draws our attention to how the reporters and editors who creates news coverage experience this process. But what about the individuals who find themselves being covered as the subjects of new stories? many are political leaders, celebrities, even activists who have sought the news media's attention, who hope to see themselves covered. But what about ordinary people who have some new worthy experience that suddenly catapults them into the media spotlight?

Palmer (2018) interviewed people who unexpectedly found themselves subjects of new coverage. Their experience has two parts, first, they find control of their own stories gradually shifting to journalists, who have identified a story that can be told that may interest ~~for~~ their own lives, but the former carries more weight because it is the reporter who decides which elements are needed to make a compelling story. The subjects of the story usually find themselves cooperating with the reporter's construction project to turn their lives into something newsworthy.

The second part of the experience is that, having allowed the press to present their stories to the public, the subjects of news coverage find that the people around them hold them accountable for that coverage. They may feel that there are errors in the resulting story yet have little ability to set the record straight, especially since the news media's attention may have already ~~shifted~~ shifted to the next topic. The individuals who had their fifteen

"minutes of fame" may find themselves living with a status or stigma that they never sought.

Being News (Best, 2020 pg. 139)

What happens when your service is abused by a companies that suppose to have your best interest in mind.

From generation to generation there are people who preys on the helpless, homeless, inmates, the less fortunate, elderly and widows. Everytime these individual are taken advantage of because in the minds of ~~the~~ scheming people, who is going to catch them?

JPay has taken a lot of money from inmates whether

It was purchasing music and games. we didn't give get the service we deserve. Many players was getting hot because the battery was swelling On the Kioski, the video visit was always cutting up many family members lost money, So ~~the~~ Department of Correction was in the search of New vendor in Georgia. They decided to go with securus/unity.

As they was changing over to new vendor securus/unity. Computers was change out to new ones, people old players locked, ~~now~~ no video visitation, its limited things they can do on this new Kioski.

because they cannot connect the old tablet if it is still working- to new Kioski. Something happen with the new vendor securus/unity. Now Doc is looking for a new vendor. The inmates has lost a lot of money- many don't have tablets, because they either burned out because of the battery or either locked.

No video visits, only two hour regular visitation with our family even though covid-19 is over. No Church services barely even though cov-19 is over the excuse is not enough officers. Also without

emails. Since the mess up with Ipay - switch over
to Securus/unity to no vendor. Our emails got
messed up it says that our email people has
to be on a email list with DOC. This has never been
like this in the State of Georgia Correction. The family
and friends who was not on visitation usually is
able to email us. Then many inmates have outside
mentors that can't even get to their mentee. This
whole thing with hindering our outside communication
is out of hand. Many inmates has changed or turned
a new leaf because of the volunteers coming into
the prison to minister to them. Many inmates
don't have family to visit when a chapel volunteer
comes into minister they ~~can~~ consider it
a visit. Personally, the inmates should have not
been left so long without services. Especially
when its for the beneficiary of everyone involved.

Question: Why is that inmates can't have laptops
and cell phones with limited services on it. Cause
Technology is advancing but the inmates are not
but they are place on streets after so many decades
decades without knowledge of certain provision like
a cell phone or laptop. What are we scared of?

~~open prison~~
What are Georgia Department scared of, its like the
System is scared to venture out to new ideas. For
instance inmates been making contraband sweatpants
out of their sweatshirts. The system is just now putting
Urban street Gray sweat pants - why so long in waiting
to get sweat pants. Many other states been had sweat
pants for inmates. The inmates are locked up. ~~Time~~
Doing time is a punishment. That hurts any inmate, ask
them.
