

Oppression of the dust is Real

Some things that are motivated under the particular thought criminalization, which leads to mass incarceration. Why is that United States has the most people locked up and out of every state in the United States, Georgia has the most people locked up? Is it really because of recidivist or cause the crime rate is high. In my view the laws are too harsh and sometime judgement is poorly made. There are so many people locked up for crimes where the witness reliability was never measured. Some others locked up because poor investigation on the State part. Because Georgia is busy reserving cash. In certain small area like Bainbridge, GA. You don't get sentence hearing, your own investigator appointed to your murder case or allowed a second expert witness opinion ~~test~~ cause of death. Especially in the 90's. Many people have went to prison off of one expert witness opinion, ^{defendants} was not allowed their own investigated the State witness. Many African American in this area jurors when they was picked only had one black juror and the rest was white. When the law says a fair trial that don't happen in Bainbridge, GA. You can count on your hand how many Blacks are allowed to practice post conviction or offered a plea bargain not too many. Bainbridge, GA has never had any black judges, mayor, police chief, sheriff chief etc. More whites run everything that county. Really its ~~hard~~ hard to even leave in that county if you are African American. I remember my home boy who lives in Alabama but from Bainbridge, GA. was leaving his mamma house to get back on the road to travel back to Alabama.

just because his tag said Alabama. He was pulled over under suspicion. This was 2023. I am like we still doing this in Bainbridge, GA. Something has to change in Bainbridge Courts and Community. My home town is a beautiful place to leave. This ideology is a white man ~~who~~ world in Bainbridge as a identity has got to change. Not all people are treated equal in this community I feel.

How many people have relocated from where they are from because the African Americans or other is not treated fairly. But you think your home town is a beautiful place to live but the identity of what the whites stand for is not right right. I wish there are watch dog groups that would go around monitoring the courts - how many African American is allowed certain job, is they treated fairly in the juvenile and criminal courts, are they allow to practice post conviction, housing, in the neighborhoods, etc. Especially in the smaller area like Bainbridge, GA.

We are killing ourselves in the name of our truths. People what if your truth is causing you to have mental health issue. What if your truth has cause you to be sick in your both with STD, HIV, AIDS or any other type of sexual transmitted disease. Ponder this was your truth worth loosing your mind or standing a chance to die with a disease? Key word 'Thinking about your decisions'.
