

Hey there!

6.9.21.

You know that we're approved to write - right?  
I hope all is well for you over there.

Okay, I'm sending you the enclosed (5 pg) "nudge" for you to see that I'm still trying to convince Scientologists how they can minister to prisoners. Do me a favor and write: Ernestyna Eichenlaub-  
c/o Scientology Volunteer Ministers, 101 N. Ft. Harrison Ave.  
Clearwater FL. 33755. Explain that you received my 5.25.21  
greeting with the articles about prison programs you think should be  
made available at many more prisons and jails. The more of us who  
express interest supporting prison programs using their technology, the  
sooner they will duplicate that reality, you see?

How have you been? I've been on the yard crew over here  
these past 9 months, so I've been outside every day as usual. I just  
finished Spring semester at Coastline, completing three classes. I'm on  
my 33rd Scientology Course - AA/Lifers' Group/and in-cell rehab studies  
too. It's all I can do while waiting for my Elderly Release hearing in  
a year or two. I'd like to see local Scientologists having workshop  
seminars here at MOSP before I go to the board, so this "nudge" intends  
just that, and your comments to Ernestyna help build that reality.

Write me your thoughts on this. And please share this with others  
who might write in support of this as well. Maybe send the old girl some  
artwork she can put with mine for an art show auction to help raise  
awareness of what we've been doing with correspondence courses.  
The more support she gets - the more likely this reality will interest  
other volunteers, right?

Write me back.

Whispers

Request = Course to do.
