

We ought to be ashamed of ourselves (especially men in the government and society) No women deserve to be taken advantage of sexually. This is not the universal law. I am saddened by this kind of fetishness being allowed by politician - this is a that need a plan. (Like ~~we~~ don't vote for such people or vote them out of the office).

How can any man determine what a woman do with their body unless you are married to that person. Only then you can suggest that your mate shouldn't wear a particular outfit etc for example. But at the end of the day they are grown. But the moral of the situation, she has to care about her own body. I am so tired of men in the government or in any particular politician arena trying to rule our bodies. At the end of the day God is the ultimate judge. Anybody who blocks abortion is sad individual. The two babies that got rape 10 and 13 years old, couldn't get abortion. Because ~~now~~ the men in the politician made it hard. So you tell me, its alright for a 10 year old to rape and have to raise a baby from a strange man. I am angry about this because I have been raped before. This baby is already going to be traumatize from the rape now she will be dealing with mental issue like depression

men get a hold of yourself. When a woman says no, let that be or you see a little innocent child minding their own business, leave them alone. I often talk about what we feed our spirit is who we become. Everyone this sad, nobody should be raped or incest. God didn't create no human being to be taken advantage of by ~~an~~ a another person. When I hear of someone voting against abortion, even if someone rape or ~~incest~~ incest. They are pro-life all the way. I got to wonder where is their morals, what they hide in the dark. This is very inhumane - when your not going to take care of the child (talking to the people who have so much to say about what a women to do about her body and the government), where the young girl was incest or rape. This is my story, I was molested from the age of 9-13 years old by my stepdad. I had a miscarriage when I was 13 years old suppose I was force to have this baby in this era I would have this child even though I was raped. You all are crazy.

The welfare supervisor didn't do anything but placed me in foster care for 90 days. Then place me back in that home to continue to be sexual assaulted. Do you know why he didn't really care about the situation because he himself was sexually assaulting children.

If you voted against women getting abortion if they are incest or raped? I ask you a question, where is your motives for real?

When you're in a place to make a decision about another person's well-being? What are you going to do? Do you try to feel what a person is going through or you really don't care. If I was a female voter this would be a problem for me. Cause being incest and rape is very hard trauma. This has put little girls and women in a crisis space where they don't know what to do because they don't want to go to jail for having abortion in a non-abortion area. I thought we live in America - the home of the freedom - that you can choose your own will. Even God Almighty don't force his will on a person, who is man to force his own will on another human being. This is governmental oppression, it's not people. I am sad once again to know this is going on in America - the land of freedom!
