

Update on my Allergic Reaction

I believe that was the worst Allergic Reaction I have ever had in my life. My Friends I was Scared to death. To get me to recovery medical gave me two ~~band~~ benadryl shots and steroid shots on separate occasions. Then additional Benadryl and steroids. I know people huh. What is the talk about. I had had allergic reaction at Pulaski State Prison. I believe my story ~~needs to~~ needed to be told and given a update. For awareness how important it is to have the proper process of a medical emergency to be render to anyone behind the walls. Secondly how important for the inmates medicine to be label with what side affects can be caused by a medicine. The drug store does this on the outside but inmates are just handed medicine with even knowing what not to do about the medicine they given. I am not going say my chronic care doctor gave to me on purpose. Cause ~~my~~ mistakes do happen. I believe it was a mistake on his part because I keep having the same condition. However I must say nurse Taya Beck, nurse Mann and nurse Shirley, Cottel, some others don't know their name now wish me back to health. I look like I never had the Allergic Reaction. I was so bad till I thought I was ~~so~~ scared for life. The process of getting to medical to get the help - was rough (security) not enough staff. you can die that way. My medical history for the last two years has been constantly have UTIs. On the ultrasound

they discovered I had cyst and tumor but ^{their} they not that large. So when I went to the Obgyn. He seen I had a constant history of UTIs. He recommended I been seen by Urology because of the constant history of the UTIs. He wanted to know if I had disease on the kidney wall. Because during me having the UTIs. I have a frequent urge to urinate, lower back pain, milky or sometime cloud urine. Have had blood in the urine. When I went out to the Urology they took their own urine ~~sample~~ ^{sample}. They place me on Cipro. a antibiotic used for the urinary tract. They place me on this medicine 48 days two a day, which known as complicated infections, as determined by your doctor, may required 500 milligrams taken every 12 hours. Prior before the Obgyn go and Urology. I also told nurse Sangletary - how my pee would ~~smell~~ smell rockie and it was something trying to push out of my bladder - she said she was going get me tested for kidney stone. But she left the institution as a nurse. So now I am being shuttled around with a constant UTI again. So I finished all Cipro the Urology assignment. Now my Chronic Care doctor want a urine sample. I had a UTI again. I don't know what made him give ~~Bactrim~~ Bactrim ~~antibio~~ antibiotic. I have never took that before. The first I ~~thought~~ thought had the Flu, ^{and} fever, chills. But all alone I was having re allergic reaction to medicine the whole time didn't know it until my body had abnormal skin paleness. Everything in this paragraph happened to me in my Allergic Reaction

Most important fact about this drug, Sulfamethoxazole, an ingredient in Bactrim, is one of a group of drugs called sulfonamides, which prevent the growth of bacteria in the body. Rare but sometimes fatal reactions have occurred with use of sulfonamides. These reactions include Stevens - Johnson Syndrome (Severe eruptions around the mouth, anus, or eyes) progressive disintegration of the outer layer of the skin, sudden and severe liver damage, a severe blood disorder (agranulocytosis), and a lack of red and white blood cells ~~because~~ because of a bone marrow disorder. Notify your doctor at the first sign of an adverse reaction such as skin rash, sore throat, fever, joint pain, cough, shortness of breath, abnormal skin paleness, reddish or purplish skin spots, or yellowing of the skin or whites of the eyes. Frequent blood counts by a doctor are recommended for patients taking sulfonamide drugs. So what happened what caused this allergic reaction - one I have suffered anemia have my life but currently off the medicine. Because my blood count where it suppose to be. One thing have not beaten is chronic asthma. Unless you are directed to do so by your doctor, do not take this medication if you have been diagnosed as having megaloblastic anemia, which is a blood disorder due to a deficiency of folic acid. Special warnings about this medication - make sure your doctor knows if you have impaired kidney or liver function, have a folic acid deficiency, are chronic alcoholic, are taking anticonvulsants, have been diagnosed as having malabsorption syndrome.

(abnormal intestinal absorption), are in a state of poor nutrition, or have severe allergies or (bronchial asthma) - this me). Bactrim should be ~~cautiously~~ used (cautiously) under these conditions. That is what happened with my allergic reaction. But here it stands today I have another UTI. I have to put in another sick. Is they going to give me more antibiotics again? I hope not, I want them to remove this kidney stone out me. They need to do a specialized Xray or sound waves (ultrasound) that can be used to diagnose and identify the location and size of kidney stones. Everytime I pee its as if its trying to come out but I believe its so big it can't pass ~~I~~ I think it is irritating the lining of ~~the~~ my urinary tract. I have pain in my back in my back that are some severe, burning itching and a frequent urge to urinate. I have red blood in the urine. Sometime I pee a little like its little blockage it depend where the stone at. I eat healthy and drink alot of water. But this stone is going to have to be treated by passing a telescopic device into the Ureter or bladder and either removing the stones or breaking them into small fragments with lasers or sound wave. I need this surgery and test so my health can be restore. Instead of doing ~~that~~ just Pulaski State Prison keep giving me antibiotic its been for two years now. I am getting ready to put the booth sick call in about this same problem. Watch I leave out with only ~~antib~~ antibiotics again.

I need some a medical office of Department of correction make sure I have my test surround my kidney stones and surgery to remove them ASAP. I am tired of hurting, and having UTIs. I am on constantly tyne lots extra strength. I am tired of this people. Being sick is no fun for anyone whether behind the wall or outside the prison. Please help somebody.
