

Date: OCT. 24

A few months ago I went and had my back exrayed and the technician told me right after he took the exrays that my back was a real mess.

I asked him what he meant by that but all he would tell me is that he'll send the results.

He in fact did send the results to me and they said that everything was normal.

But I do not think that he was telling the truth on the paper that I received.

Now I have lumps between my shoulder blades.

I am in a lot of constant pain.

I finally went over to the medical and talked with the lady at the window and she said I needed to put in a medical slip in and that's what I did.

Still I have not been seen by any on.

I am in a lot of pain.

This is the kind of medical help that you can get in prison.

Breathing is starting to hurt and when I walk the pain intensifies.

Within a few steps I am out of breath.
