

## Seeking Justice

As I communicate with my new pen pal - I find myself being thankful that I can add excerpts from my emails to her - to my blog - here is my latest excerpt

Back to earth - No - I never heard of that Integrity group - My problem is no one will intervene in my behalf as long as the State controls my legal representation, as they continue to oversee my death by natural causes - if you can call their premeditated actions natural ?!? They are in control of my legal representation and want to keep it that way and will since no group wants to intervene to stop them - which places me in a dilemma of how to change that - See, if you can get someone from that Integrity group to email me and from Zoom too - we may be able to reverse the trend and put a stop to their criminal actions ! What is needed is an investigative reporter to begin asking questions and seeking answers as to why the withholding of exculpatory evidences in my case has not received the paramount attention, diligence and zealous advocacy it requires ! If I cannot get anyone to challenge the facade of legal representation being forced on me - I will continue dying a slow agonizing death at their hands and in the end no one will be the wiser ... Take note of that and seek to help me reverse the trend !!! As long as they can force their faade of legal representation on me - they feel safe from prosecution for racketeering and the knowledge there is very little I am able to do about it !
