

We are deserving to Vote Just like Every Eligible Voter!

Here goes another oppressed group of people: The ones who has developmental issues. This is sad I cannot seem to get away from the word oppression this year. We often talk about how other nations' are oppressed but what happens when it is right in the neck of your words? ~~The~~ Fair voting and proper protection on the ~~plan~~ plane for the people with wheel chairs. Nobody wheel chair should be damage or not treated fairly because they ~~have~~ have developmental issue or handicap. This is a issue that ADA American Disability Act violation. Especially with their voting. Because data is advancing at high speed. Why haven't these problems haven't been solved ~~for~~ for the people that are handicap and has developmental issues. Such as the speech impaired - make a note of this even Stephen Hawking had a computer that talked back to him - why can't this processed be used for the one has a developmental issue. Even with the deaf, why can't Braille be used in their voting process?

Some other concerns at polling, why haven't the data been updated for people who are Americans Citizen but fluent in another language. Would it be better to provide data that speak multiple language to choose from. Another thing why is ~~this~~ this group of people are treated like children. ~~Why~~ when they just can't get around physically like others because of their physical problems. Oh we understand they can't have a driver license but what about a State ID as other citizen that don't have driver license. ~~but what about people who are not citizens but don't~~

This is wrong in certain states to have conservation ships over ~~the~~ over ~~the~~ this group of people that are disable and not giving them the equal opportunity to vote. If this group of people has a sound mind why can't ~~have~~ ~~the right to vote~~ they have the right to vote and get a State ID. Just because people has developmental issue don't mean they are not capable to make decision. For example, I had a uncle that worked at the Blind factory. Each individual had a developmental issue. But they was capable to make DOT vest, mops and brooms etc. How can we disenfranchise this group of people from enjoying the right to vote?
