

OPEN LETTER NEW YEAR

As the new year starts our minds & focus should be on the state of our World. the current threats of world wars, economic instability the ever increasing prices & Inflation of everything, as well as deflation. It should be enough to get most everyones full attention.

in these current times we should as a civilized society seek to better ourselves, our way of life, address the big ever present elephant in our room.

How can we make life improvements on a individual level? The Old new years resolution delemma arises. Some do the same thing every year, weight loss start exersizing. ode to those who stick with it past february. Moreover the seeking to better ones way of life is key to longengevity. We all seek to survive, the strive, to find that middle ground in our persuit of life liberty and happiness.

This year I will embark on a new persuit as i start the new faith based program to learn about my own personal issues, my path as a christian, the spiritual walk I have endeavoured upon for most of my life, I swayed from the narrow path, led a poor life style in my twenties. Having learnt from the error of my ways, my battles with adictions, alcohol.

I am looking forward to the anger managment classes, the substance abuse classes, the victims views awareness course, videos, with an open mind. to seek to understand the full effect of my faults, my errors, my ways.

Growing as a christian man who has redemption, a second chance at a new life? Indeed I do Live my life one day at a time. Every day is a second chance at a new life.

From Texas life Row....

Charles Thompson
