

The Power Of Artificial Intelligence

Gail,

I don't know what to say - I've been trying to prove I am not a murderer for over 40 years and even though I can produce evidence to show I did not receive a fair and impartial trial - the injustice I suffer continues to plague me as the truth keeps getting suppressed and oppressed no matter what I do to try and bring the truth to light ! There are forces operating that have proven to be above the law and masters at manipulating the legal system by controlling my legal representation !

I have tried to explain this to you, but repeatedly seem to have failed - if any of the groups that propose their services to bring forth my innocence could have been of help, beyond lip service - I would have been vindicated decades ago - I have brought forth the evidence myself proving I did not receive a fair and impartial trial, but to no avail ... You have a copy of a motion I filed myself and don't you think it strange none of the attorney's mandated by law to represent me have put their support behind the evidence that vindicate me of any kind of murder ?

My problem has been and continues to be in trying to bring to light the faade of legal representation being imposed on me that refuses to bring forth the evidence that vindicates me and that is where an artificial intelligence program can be of help - it will bring to light the evidence I outlined in that motion does vindicate me, by showing I did not receive a fair and impartial trial and raise the question why none of the attorney's mandated by law to represent me have done their job ! Especially if I were to put each one of them on the witness stand and ask them questions on why they refused to recognize the evidence proving I did not receive a fair and impartial trial ! You see the attorney's presently mandated to represent me don't want to go on record explaining their failure to raise the issues that vindicate me of any kind of murder and to this point been able to avoid doing so ! That is why I want to bring them before the court of public opinion and ask them why they been refusing to raise the issues that vindicate me and using an artificial intelligence program to point out their failure puts them before the court of public opinion - since if the artificial intelligence program recognises the issues that vindicate me - they should too !!! Leaving them no valid reason why they shouldn't effectively raise and present the evidence to the courts themselves or explain why they refused to do so and they have no valid explanation as to why they refuse to recognize the evidence themselves !!!

First - I have to get an artificial intelligence program to validate the evidence brought forth in the pro-se motion I filed warrants the conviction and sentence in my case be overturned - When that happens no attorney can deny the evidence that vindicates me doesn't exist !!!

This shouldn't be hard to understand and if you put forth the energy that you have seeking other avenues of help and support instead into helping me get an artificial intelligence program to validate the evidence brought forth in the motion that does warrant my conviction and sentence be overturned - it will happen by putting the attorney's presently representing me on notice that they have to raise the issues themselves or explain why they refuse ...

Okay - I will place a copy of this on my blog - take care and keep dry - Milo
