"SECURITY, SECURITY, SECURITY"

If its not one thing its another with the Florida Department of Corruption! Known to most of you as the Florida Department of Corrections (FDOC). Here we are in the hottest part of summer August 12th and they take the only relief we have back here, cold water. Saying its a security threat. Security security security, I hear this all the time when they need an excuse to do something ridiculous. For instance we had black and white TV's all the way into the 21st century. When a grievance was filed to get color TV's, they said," Color TV's is a security threat." Don't that just tickle you. I mean how ridiculous is that?!!! We've had these cold water kegs sitting on the catwalk with the National Guardsman all last summer and this summer, and now all of a sudden out of the clear blue sky there removed as security threat! We've had Senator's, Judge's, Regional Directors, Warden's and even the Secretary of the FDOC walk down these catwalks while were at day room, where they've seen and walked past these water kegs and no one has made an issue. But now all of a sudden its a security threat?! Come on let's be real, if it is anything at all, then its a vindictive act showing how much they hate death row inmates, and want to cause further suffering. These wings that we are warehoused in, are ovens! They are down right hot! If you put a dog back here in these cell's with us, you would have a hundred thousand PETA supporters out front protesting until you got that dog out of this heat. We've had days were its over 100° back here. Just in the past week we've had some of the hottest days imaginable. And the only relief we have is cold water at day room or three cups of cold water a day on non day room days. This is a living hell, only to be made worse by vindictive FDOC employees who should not be in the care custody and control of human lives. We need change, and we need it now. Human compassion seems to be absent as you rise through the ranks of the Florida Department of Corruption. Why this is, well its beyond my understanding. But one thing is for certain, this is just one more piece of evidence showing how badly the FDOC is need of a total overhaul. May God have mercy, because the FDOC sure doesn't have it. Regretfully Submitted Ronald W. Clark Jr. #812974
