Where's The Help ?

About that legal brief - I have always thought getting it online would be easier and better than having to make copies every time I sought someone's help to get it reviewed by an AI. - I knew the expense of making copies and mailing them would be high - when by simply putting a copy of it online would be a one and done - I would be able to refer whoever's help I sought to the copy online and that includes an AI - program - hey don't worry about sending it overseas - I will inform Charlie you are not able to afford the cost - it is no big deal and I hope that Diane starts to email me since it will much less expensive to send her a copy - I am fairly certain she will be able to get a copy online - its a damn shame after all this time you weren't able to find someone to assist you since that brief is the stepping stone to my vindication - once an artificial Intelligence program reviews it and gives its opinion according to the letter of the law - that will show a pattern of suppression and oppression by the State mandated attorneys assigned to provide me diligent and zealous representation me - which amounts to obstruction of justice (criminal behavior) Alright - I am unable to find a group that is supposed to assist me - to assist me - so I have to act pro - se and I can't function on my own, like I need to do without assistance - getting an artificial Intelligence program to verify that the fact exculpatory evidence was withheld from me at trial proves I did not receive a fair and impartial trial and that the attorney's mandated by State law to provide me representative before the courts collectively refused to argue this evidence that vindicates me of any kind of murder above my repeated demands to do so - proves they are guilty of obstructing justice and that is the definition of Racketeering - no only for them but all involved since everyone failed in their duty to insure justice prevailed ... It is not the States job to win, but insure justice prevails That is the law and an artificial Intelligence program will point that out too according to the letter of the law - My rights have been violated and now - I have the opportunity to have an artificial Intelligence program to point that out according to the letter of the law - the same law all involved in my case criminally failed to provide me ... The problem is you do not see or want to understand the importance of what I just shared with you and why I am still seeking help instead of acting on achieving my vindication through the help of an artificial Intelligence program All I been getting is excuse after excuse of why I can't achieve my goal - instead of Okay let's see what happens !
