

Double Down on the Unnecessary
How is it that society says Trump is better
with the economy and immigration?

First of all let's go back in time. There would
have not be no Covid if Trump close the borders.
When he learned of the first case that head
into United States. Not only did he allow our
Nation to be overtaken by covid, which cost
us billion in health care cost and mortalities,
at the same time effect^{ing} our economy in so
many ways. Which cost the worst economy
ever. Notably point often overlooked in this
presidential election. If that is not enough
compelling evidence to not vote for Trump.
Another key point is tariff. How our grocery
store price was at its highest. On the other
hand many our goods was stuck on
export ships. This was a contradiction to
make America great.

While at the same time racism and hate
crimes was at its highest in America. Church
shooting, many unarmed black men killed by the
police, while the LGBT community suffered
daily as they was killed because of their
sexuality. Many ~~racist~~ racist groups was
empowered by support they got from Trump

as he was president. When that wasn't ~~even~~ enough other political leaders find themselves in harms way such as January 6th insurrection. While others tried to personally hurt individual political leader's family member such as Nancy Pelosi. When that wasn't enough he attack our military transgender, women reproductive, and treat immigrant like they was piece of trash. Even though he is married to immigrant. Surprisingly some people are choosing to say Donald Trump behavior is ok.

Thus ignoring this is a convicted felony of 39 plus accounts. Henceforth, the most compelling evidence here is some of these same voters has been on the jury, set as judge or district attorney in local communities and nationally over the United States. This has proven that we live in a double standard society. You sent me to prison as convicted felony. I don't get to vote nor run for a political office, what makes Trump different the next person, criminal. To emphasize that every criminal should be able to vote and run for a political office if they desire.

Conversely, if Donald Trump don't have to do all, what comes with break the law. Surely I should have another chance at life in society after 27 years, on the positive side I should not be on no type of ~~parole~~ parole. Because Donald Trump has been given a chances after chances. Even gets to walk around enjoy life as a convicted felony on the outside.
