Sept. 12, 2024

Hello anybody who is reading this. I don't know what the drug scene is out there in the ~~word~~ world, but in here they're smoking an unknown substance sprayed on paper, (K2).

Nobody knows its origin, but roughly 60% of the inmates have tried it. Two Saturdays ago I went out in an ambulance overdosed on K2. They're going at it strong, and doing a lot of very obnoxious things to raise money for another dose.

Is K2 done out there? I never hear about it on the news. Fentanyl is all we hear about on the news, but some in here believe the two are one and the same.
