

4 The Conversation Everyone Should be having!!

Lets Talk about Colt Gray's Appalachian High school's shooting.
The question I want to ask "Where do most of the bullying
come from in our neighborhoods and school system?" The
parents for sure. I can attest to that because our children
went through alot in school. Due to ~~as~~ their parents being in
prison. Just yesterday, my older son and I was having a
conversation about how the children would treat him.
He reflect on one kid for example said "your mom
put quote". ~~the~~ my son said "No, mamma didn't," they
got into a real bad fight. That landed him to a two
week suspension. Where did this child get his information,
to bully my son his parents. Their we're many more
bully instances with multiple student. Because word
of mouth spread. All three of my children had to fight
everyday at school. One of the students that was bullying
my older son, planted a pocket knife in his bookbag at
school. which led my child to go to the juvenile ~~to~~ detention
Center.

My children reported incidents to the teachers. Many teachers
came up against my children and started to mistreat them
as a nobody. Because they know their parents was locked
up in prison. One teacher went far as to tell my daughter
that she will never finish ~~the~~ school and never be nothing
in life. All my children are grown but they remember
every single encounter they had to endure at the hand
of a bully. I share this to let you know we have to
start viewing this topic from many angles. But some
views has been neglected, so this is why American keeps
having mass school shootings. The truth be told, many
people prays on people who are quiet. Because they
think you up to something. They can't figure out what

your thinking. So that put your enemies at odds with you. All three of my children are quiet. I am a quiet person. ~~It~~ If you're that type of person, what is the ~~best~~ best way to get that person upset. One is to poke at them with a rumor about a parent or ~~themselves~~ themselves.

We have to be careful how we evaluate situations in life. We don't know the threats and mental health impact Colt Gray went through as a result of the deceased students' and teachers'. Did they deserve to die absolutely, no. Another thing, how many other students knew or was part of the bullying pertaining to Colt Gray? Many say he was quiet. I believe that is the main reason someone would want to bully someone. Secondly, Colt didn't have his mom in the home or she was currently away. Apparently the dad was a full-time parent. Often children are weaponized when they don't have both of their parents in the home, by the other students in the school.

My children has told many stories of the children at school using bottle of their parents being in prison as a weapon against them. However, we don't know the story of Colt's mom. Don't need to know why she wasn't in that home with her son. Consequently, when you live in a small town like Winder, grown-ups talk about everybody's business. Children often be the one who hear these negative conversations about their target. I've been through it grown up. Grandparents, uncles, moms - every generation has been through this type of bullying.

Earlier I talked about my daughter who had to fight the bullies all the way through school. The teacher purposely told her she was going to be a drop-out. Would never accomplish anything in life. I am here to tell

You my daughter ~~can~~ prove everyone of her negative talkers wrong. As she graduated from Fort Valley University. She has taught Pre-K, formerly was a counselor in Middle School in Atlanta, GA. Mental Health is everything to our family, so much so still that same daughter works for a suicide line for 12 hours. My daughter and I had a conversation about Colt Gray. As my daughter was saying the whole situation was said "It sad mamma, they could have helped him. The whole world failed this little boy." The she said, everytime I hear the story "I cry." My daughter and I have a heart for children. "My daughter and I, had the same purpose in life to save ~~the~~ children from destruction.

We've all know a Colt Gray. They may not have shot up the school. But they are walking around everyday in the same shoes crying out for help. The same as Colt Gray was asking for help as he let someone know that he was being bullied. If no one helped him, he was going to take matters into his own hands at the age of 13 years old. Not one single person handle the situation in a reasonable manner. ~~At~~ The dad, school counselor, the agent that say he was on the radar, DFACS, and the school failed this little boy. Even the man warned the school. How ~~was~~ sad nobody did anything to prevent this devastation.

On the panel, why is this becoming ~~more~~ normaly where parents are putting guns in the hand of children? It is sad to know Colt's dad purchase a high power AR-15 for Christmas. This is a baby, he should not have had access to a gun. Secondly, who doesn't take a threat serious from any individual? In the ~~same~~ same fashion, every agent and person involved that didn't prevent this from happening. They could have. Everyone of them should be held accountable,

forevery murder as well as the aggravated assaults. Safety is everything as well saving lives, when we get into the realm, that we don't care about humanity. We are doomed. Everytime it appears when there is a mass shooting in the schools. There are so many careless mistakes. This has to be turned around.

We are becoming a broken record as we repeat ourselves for every mass shooting in schools. My prayers and thoughts are with the ~~parents~~ family of the victims and the children that was traumatized from each event of tragic mass shooting at each school. But we got to start holding these adults at a higher standard when it comes to children and weapons. As well hold the adults to prevent these tragedy from happening. Nearly just about every mass shooting has been a male student. What is going on with our male children we got to get inside the minds of the children before they decide to commit suicide, take drugs or turn to violence.

Equally important, the way to do that is to treat ~~the~~ the symptoms of the mental health problem. Before the the behavior comes. I have ideals of how the behavior can be prevented through another channel. But I feel like when I share my ideals. People steal them, making money for themselves. Even my daughter said, Mom that is a good ideal, but you have to worry about the thief and getting no credit. To emphasize everytime there is a mass shooting in the schools. I feel the urge to press forward with my ideal. For this reason I will share.

I do not have the funds to get the project up in running or to hire my staff. I need help getting my vision off the ground:

My organization will be titled:
BE D LA COOR'

BEDLACOR' will be a professional blogging Service for children from the ages of 8 to Seniors in School. Everyday they will blog before they start their school work in each class, everyday, I will have mental health counselors' on stand by if their are a red alert that needs to be handled. My mental health counselors will be on call 24/7 to meet the child where they are. I will have a automatic red alert button that signal to my mental health staff where the problem is and the child's past will pop up so they can read it. Immediately going to the school or the house of the child to help them.

My professional blog business will be a prevention to keep children off the road of destruction. My goal is to take down the percentage rate to school shootings, dropouts, violence in the streets and homes, as well as incarceration and suicide. Finally reducing the mental health ~~tragedies~~ tragedies that we hear about everyday. Truly ~~I~~ I desire to be that solution to our youth problems. One post can solve many problems in a few seconds. I also want to implement a special software where the ~~Computer Software~~ ^{Website} will develop a friendship with each child ~~to be able to~~ and understand them so well till they will freely share what they are going through. Notably each child will be able to blog on Saturday and Sundays. There will be special incentive ~~to~~ free meals at home, free games ~~on the website~~ on the website additional we want to provide snacks and free meals for the weekend. However I would love my high school students to be able access free Vocational class on the weekend, on our website while creating a mentorship program helping them to find jobs when they turn work permit age. I want to include in my software information explaining to all teen as to why its important to remain in school and complete it. The ultimate goal is to reduce

mortality rates amongst our youth in America,
As the CEO (Jennifer Johnson) REDLACOR my
additional goal is: I want to add to this program,
if a student having a moment and they need to get
on the site to blog to get out what they going through.
They can access a computer in their class ASAP. My
Staff will always be on a alert and ready, Let them
blog. Because this is a good outlet to release whatever
they need to release. If someone is ~~interested~~ interested
in helping my vision to come to past please contact
me - <http://betweenthebars.org/blogs/1092/>

However, Colt Gray should not go to prison for the
rest of his life or tried at all. I am not saying what
he did is ~~small~~ small. Simple as this, how is you
going to punish him even though he asked for help. ~~many~~
Some people knew he was suffering mental health problems
and was struggling with others bullying him. So how is
it, now he's a monster and deserve to be tried as a adult.
No Georgia we need to stop this behavior that prison
is the answer to just about every situation.

Its sad in the United States that we have narrow
views, when it comes to handling situation. In
view rushing to put people in a prison is not the
answer all the time.

Georgia has this complex for everything they need
to go to prison. What is that going to do Georgia?
When Georgia prison today is the most brutal
and cruel place any person can be. The things going
on in Georgia Prison is very inhumane. The conditions
are very poor. As mental torment is on the rise.

Where inmates are being raped, killed, selling drugs,
violence is the highest ever and people are on drugs.
So lets not flex the criminal justice system is a fair
decision for any human. When you have inmates on

meth, or other hard core drugs. Walking around looking malnourished. Many stay up for nights doing meth. So Georgia you feel this is the answer for Colt Gray or any teenager right now. People you better check these websites in Georgia of what happening in the Georgia prison. This point is over looked in the State of Georgia. Henceforth, I feel mental health is the best remedy for Colt Gray. He is redeemable, because brain will have opportunity to continue to develop as he grows older. So the service that was denied should be granted ASAP.

He also should be home schooled and have ~~can~~ counseling as to how dealing with things that has transpired by his hands. Colt should be barred from social media at least a year. I believe he should do at least 6 months in juvenile. The juvenile should get his treatment started. I just believe in my heart this little one need his mother. This six month while Colt away will give her a chance to get her life together. I believe this kid got caught in a spiral of what he thought was right as result of his father. On his own I believe he is a good kid. He need tools to of how to handle situation like this in the future. If arise.

Every bully needs counseling as well in these schools. We got to put a end to violence at school. While equipping people to do their jobs in a professional way. Today we live in a society where moral standards are very low. Nobody is held accountable for their irresponsibilities. The ~~point~~ point often overlooked, when something happens that could have been prevented. That when society and law enforcement want to blame the perpetrator harshly, when it was on the grown up's that didn't make the proper decision. No more of that just sending individuals

to prison. Just because the criminal justice system always feels that is the solution to every case in Georgia. Lets begin anew by holding the right people accountable. So that the jails and prison can be reduced. There are so many inmates that are out of place. If people in the criminal justice system would assess the situation better than being in a judgemental moodset. The prison nor jails would not be full to the capacity.
