Ah - something else - if they (the attorneys mandated to represent me) are not going to bring forth the evidence that proves I did not receive a fair and impartial trial - why would I want them to raise any issue calling for me to be resentenced ? That would not make sense and only get them off the hook for their failure to provide me the representation I been demanding to bring forth my innocence of any kind of murder ... You will better see what I mean when I gain use of an artificial intelligent program - that will quote the law according to the letter of the law as it is written and bring out the injustice I endure due to complicity of everyone involved to cover up (oppress and suppress) the evidence that vindicates me ... I don't need to show their motive in doing so - only bring forth the overwhelming evidence that they did it and continue to do it by controlling my legal representation...

Can you understand that ?
