OPEN LETTER 2025

Happy new years to all & to all a prosperius year ahead. This quarter Century mark is a turning point in new Technology, life ahead and how its going to be enhanced by AI. Its disturbing still to find commercials advertizing Have a relationship with your AI phone!

We have a turblulent world full of wars, political adversaries and the likes. Two Wars rage on, that could indeed turn into global conflicts.

To the World I say put down the electronic device, speak to an actual human being, talk on that phone instead of talking to it. try writing somebody a card or letter, after all our postal system is at risk from becoming a thing of the past.

The best aspect of human nature is our civility, our ability to have compassion for others. To think of others, to have humility or be selfless.

In my own life I have made leaps and bounds for change. Im one year into faith based programs here on Life row. Having completed anger managment, bridges to life, authentic manhood. As the new year starts I am begining classes for over comers (drug & alcohol substance abuse) and voyager (bibilical based course.

I so look forward to growing as a human being, I espically want to express my appreciation to the valuable insights taught by the inmate field ministors here. Lastly to thank the Prison system for the polunsky radio station The Tank. Programs for all in all areas of Tx prison system exist. we are all worthy of some redemption. Praying for more changes with eyes wide open on the progressive changes ahead.

Humbley In Awe,

Charles Victor Thompson #00999306
