. "MONEY TALKS AND BULL SH** WALKS!"

The United States Judicial system is built around Equal Justice Under the law. Its beautifully founded and formatted by our forefathers. But its little more than a hypocrisy, a fraud rooted in deceiving people into believing that all are created Equal. The fact of the matter is that the rich will always have better representation than those of us who are poor. Therefore equality does not exist in the U.S. Judicial system. The rich can victimize the poor, murder, rape and steal from them, and if caught, will buy their way out of a legal jam with a high powered attorney that the poor defendant couldn't even fathom. No the poor is stuck with either the public defender's office (PD), which has limited resources, or conflict counsel who has even less resources and less experience than the PD office. We've seen it time and time again where a celebrity buys a non guilty verdict in a murder trial. Example, Robert Blake, O.J. Simpson, Marlon Brando's son Christian, If those individuals would have been your average Joe, that couldn't afford those high priced attorneys, they would all have been sitting behind bars. This is a prime example of Money talks and bull sh** walks. Cause a poor defendant, couldn't have got through the front door, of those law office's. And this is not just the biggest problem with the U.S. Justice system, but its one of the most horrific problems with the death penalty! And its one of the reasons that the state of Florida has 30 exonerations. That's right 30!

In the 2019 gallop poll only 36% of Americans supported the death penalty, when given a choice of life in prison or death. This goes to show that Florida's Governor hasn't done his research. For he's on a record breaking 9th execution in a year, stacking dead bodies up in his bid for the office of the Presidency in 2029. Politicized homicides, perpetrating a facade of justice. A blind man can see what this man is trying to do. This tactic of politicizing the death penalty, hasn't been done in decades. We are needing your help in campaigning against these deaths, showing that these dead bodies, is not the path to the Whitehouse and oval office. The time for abolishment is upon us. But its going to take thousands of protestors in and around the execution chamber, and outside the Governor's mansion, combined with celebrity star power to bring attention to what's going on here. If your a celebrity, or know one, please send this message. My name is Ronald Wayne Clark Jr. #812974 and I've been on Florida's death row for 35 years for the wrongful conviction and shooting death of a 38 year old white male. Exculpatory evidence (clothing), was hid from the jury and later destroyed to conceal this wrongful conviction and protect three sitting Judges who botched this case, one judge was my trial attorney Henry Davis the other my trial prosecutor Lance Day, and the third was my trial judge David C. Wiggins. Who should have excluded himself from these appeal's under F.S. 38.10 and transferred the case to another district. But welcome to the U.S. Injustice system where the poor are little more than collateral damage in these politicians bid for capital hill. G-d have mercy!
