What Artificial Intelligence Will Do !

My objective in using an AI program, is to achieve my vindication of any sort of murder and demand my immediate release from Florida's death row ! I believe this can and will be achieved once an AI program rules on a preexisting pro-se motion, that a Federal Judge held, had no merit when he denied it - My contention is the judge's ruling was bias and an AI program will bring this assertion to light - since it will rule on the pro-se motion according to the letter of the law - without bias or prejudice ...

For over forty years the Florida legal system has been manipulated to make me appear overwhelmingly guilty of first degree murder and an Artificial Intelligence program will bring this evidence out, beginning from my false arrest, to revealing a pattern of obstruction of justice that amounts to Racketeering (RICO) ! Again, the Artificial Intelligence program will only rule according to the letter of the law without bias or prejudice ...

The appellate record already exist with the names of all involved in the oppression and suppression of the evidence that clearly vindicates me of any sort or type of murder - the list of names is long and damning, as it calls for each person to be indicted under the RICO Act, for their participation in obstructing justice through ignoring the prescient of the law that demands my conviction and sentence be overturned - no one evolved in my case will be able to condone their actions - this includes Judges - State Attorney's and the Attorney's mandated by law to represent me !

An Artificial Intelligence program bringing the facts of my false imprisonment of over four decades to light - will spark the interest of the Court of Public Opinion - which will start the outcry for my vindication and immediate release - how I decide to proceed from there will depend on any resistance brought holding up my vindication and immediate release !!!
