

Good Morning Sweetheart,

Sorry for creating a misunderstanding - everyone's emails got screwed up over the fourth of July weekend - I didn't receive your email of the third until the morning of the ninth and by then I still didn't know what was going on ! Let's hope that doesn't happen again ... Yes, it did get me thinking and I do need to find more assistance - male or female - since it dawned on me just how vulnerable I really am if anything were to happen to you or Christine - I would be left grieving with no funds and the loss of a loved one - neither I would be able to replace adding to the hardship !!! Anyway - it is a problem that needs to be worked on if I am going to continue on with my struggle - ah - still no word on the package and I will let you know immediately when it arrives - thank you !

Yesterday - Paul mailed a copy of that brief you have to his private attorney and she should have it by Monday at the latest - plus she will be here to see him on the 25th., but we expect to get some reaction out of her before then ! I am not convinced she will respond positively, but Paul seems to be - you seem to forget - how knowledgeable we are concerning the law as that pro-se motion you have is an example of my legally representing myself and having it recognized as having merit - even though it got erroneously denied due to the continued oppression and suppression of the facts that clearly show I did not receive a fair and impartial trial - Paul recognises that and knows his attorney should also - anyone halfway familiar with the law will recognize the evidence that proves my sentence and conviction has to be reversed due to the letter of the law that states any withholding of exculpatory evidence on the trial level demands a conviction has to be overturned - Paul - knows his attorney knows this, as we wait on her response !!! Also an artificial intelligence program after being instructed to review the Georgetown Law Journal will immediately recognise my conviction and sentence has to be overturned in accordance to the letter of the law - which will raise the question of why none of the legal minds involved in my case have done their duties to protect the integrity of the law by admitting the evidence is clear I was denied a fair and impartial trial !!! So you see if an artificial intelligence program can recognise the evidence in accordance to the letter of the law clearly shows my sentence and conviction has to be overturned - the question becomes why over one hundred legal professionals haven't done so ??? Especially after I have shown them negligent by building an appellate record showing the prejudice I suffer by what amounts to their obstruction of justice in denying the fact of the letter of law calling for my conviction and sentence to be overturned !!! I know this must sound like a lot of mumble jumble to you - but any unbiased legal mind will understand it and that is why I want an artificial intelligence program to review, and rule on, that pro-se motion - showing the prejudice I suffer by

what amounts to criminal racketeering by those in the legal system that have oppressed and suppressed the evidence that vindicates me of any kind of murder !!! Paul knows and understands this and now we will see how his private attorney reacts - since her helping me draws attention to the injustices in his case too !!! He wants to believe she will do the right thing - me I am skeptical - since doing the right thing will put a target on her back - but will also show her to be honorable if she does the right thing - a noted attorney not afraid to go after a criminal enterprise of attorney's using the legal system to advance their own agendas through ignoring the evidence that vindicates me of any kind of murder !!! That is criminal behavior they are betting on never coming to light !!!

Okay - enough - I am back at work half heartily for now, but will be pushing toward getting an artificial intelligence program to review and rule on the merits of that pro-se motion ... I am sending Christine a copy of this email and also adding a copy to my Blog - take care and try to keep cool - Love you - One Eagle - XoXo
