

## ON THE PASSAGE OF TIME AND PEOPLE

---

A lot of time has passed since my last post -- and I could list a lot of excuses -- the main reason however is because of all the dramas here. The prison director finally left, the one who blamed "cell phones" for his failures at ~~being~~ being any good at his job. While in truth, he was the one responsible for the nation's most dangerous prison riot in a near thirty year span.

That had nothing to do with "phones" and everything to do with corruption within the South Carolina Department of inCorrections, SCDC, and their mishandling of gangs. If prisoners actually had parole eligibility, work credits, and things to work towards, the situation would be less dangerous -- but no one seems to be smart enough to figure that out. Instead they yell it's the "phones" like a Trump derranged leftist out of touch with reality.

Time passes; and truths are revealed.

Things are changing and we seem to be getting more spiteful and hateful people in charge that DO NOT want anything other than a paycheck and to put their foot on some fellow human's necks (that they don't even see as being human), and therein is where Karma will have her way I hope on them in time. I see it happen all the time.

In here we lose a lot, and people go, with some gone by death and some gone by choice. A "constant" who says they will never stop talking to you, will suddenly be gone after many years of having them in your life. But, who can blame anyone for not wanting a prisoner in their life. The dramas of the prison Nazi staff spills out onto the lives of those with imprisoned friends and family. It's sad to see how low some of the prison staff are in their humanity -- or lack thereof.

If I could turn back time to 1999, I would.

Matrix was right, it was the height of us.

Even prisons were superior in those days compared to todays total institution tactics of ineptitude.
