A STORY ABOUT CANCER YOU MOST LIKELY WILL FIND HARD TO BELIEVE

I want to share a story with you which most of you will find hard to believe. If I did not see the actual medical records and actually know the person this story is about, I most likely would not believe it myself. I am a huge skeptic and it is very hard to sell me on a spectacular story like I am about to tell you. But I swear to you everything I am about to tell you is 100% true.

Six years ago my cellmate got devastating news from his 77 year old mother. She had just been diagnosed with stage 4 cervical cancer and based upon her doctor's prognosis only had about 3-6 months to live. She was refusing Chemo and/or Radiation treatment because she believed at her age the treatment would be worse than the cancer and in the end she still would lose the battle. My heart hurt for my cellmate and I watched him cry in agony as there was nothing which could be done to help his mother. I will call her Ms. Jones.

Ms. Jones' Oncologist asked her if she would be willing to try something which might sound crazy at first but he asked her to at least hear him out. He wanted her to start taking De-Worming medicine for dogs. Yes...you heard me correct. He wanted her to take worm medicine which you can buy at any pet store or Wal-Mart. When my cellmate told me this I thought he and his entire family had lost their mind and I was sadden to see them so desperate for hope. Hope which I felt in my heart would not work at all.

HOWEVER.... In the next two months Ms. Jones' cancer started to improve. I was skeptical and thought she was just telling my cellmate this to make him stop worrying about her pending death. My cellmate also thought she might be lying to him so he asked her to send in her medical records so he could see for himself. And.... she did. She continued to send in her medical records as she improved and in 6 months she was 100% cancer free. All from taking NOTHING except for De-Worming medicine. It has been 6 years since Ms. Jones was supposed to have been dead from cancer.

What is this medicine? The active ingredient is FENBENDAZOLE. There is a website called "My Cancer Story Rocks" in which Joe Tippens discusses how he also beat cancer with this medicine. It is the most amazing thing I have ever heard in my entire life and I cannot believe a viable cancer treatment may be as easy to get as picking up a package of de-worming medicine in the pet aisle at you local Wal-Mart.

I am sharing this with you because I know it worked for Ms. Jones. I know it may not work for everyone (actually no cancer treatment does) but if you have been diagnosed with cancer or know someone who has and there is little hope.....what do you have to lose? I realize people will think I am crazy and me being incarcerated makes it even worse as most will think I am ignorant and full of "conspiracy" "Bigfoot" "UFO" stories, but I promise you that in the case of Ms. Jones, this de-worming medicine cured her cancer.

I strongly urge anyone reading this to Google: "My Cancer Story Rocks", or "Can Fenbendazole Cure Cancer?" Research this for yourself.

Ms. Jones' story is a miracle to me and I don't care what anyone says about it not being true. I know it is.

I hope this blog post will at least make someone look into this and perhaps save someone's life.

Thanks for reading my blog.
