

Does Anyone Care ?!?

Sadly, they are picking us off uncontested here on Florida's death row one by one with the mandated attorney's the State appoints to represent us - creating evidence of a real conflict of interest that can only exist through a criminal enterprise of racketeers that is going unchallenged, allowing the State free reign to do whatever they want unchecked !!! Duh - what did he just say ?!? I been adamantly stating my case contains clear and precise evidence of racketeering and that an artificial intelligence program will point this out, ruling under the strict letter of law - designed to indict those who violate it ... My problem continues to be finding those of strong moral character willing to prosecute their constituency who have violated their oaths to protect the integrity of the law - which is why I am seeking an audience with the court of public opinion based on the unbiased ruling of an artificial intelligence program in accordance to the letter of the law - bringing into question If an artificial intelligence program can identify a criminal enterprise within the legal system - why aren't those who took oaths to uphold the integrity of the law coming forth to prosecute those who have violated their oaths ?!? Bringing into question, if the whole legal system is corrupt !?!
